NANO CERAMIC ABRASIVE TECHNOLOGY

PAINT CORRECTION SERIES

- No Silicone
- Low dust

- Easy to use

- Body shop safe
- No mess/easy clean up

- Excellent 'workability'
- Water based

Precision Cut effectively removes 2000+ grit sand marks from fresh and factory cured paints. Extremely effective in paint correction process for removing moderate scratching, paint defects and oxidation. Excellent results are achieved by rotary buffer or dual action polisher. Engineered for use with wool, foam or microfiber pads. Only a small amount of product is required to achieve outstanding results.

GT23608 - 8 oz. • GT23632 - 32 oz. • GT23601 - 1 gal.

Precision Cut HD effectively removes 1500+ grit sand marks from fresh and factory cured paints. Extremely effective in paint correction process for removing heavy scratching, paint defects and oxidation. Excellent results are achieved by rotary buffer or dual action polisher. Engineered for use with wool, foam or microfiber pads. Only a small amount of product is required to achieve outstanding results.

GT23008 - 8 oz. • GT23032 - 32 oz. • GT23001 - 1 gal.

Precision Finish contains no fillers and effectively removes, not hides, micro fine scratches, swirls and holograms. The perfect paint correction finish step to produce flawless perfection and paint clarity. For use with foam or microfiber pads and DA polisher. Also very effective with rotary at low speed with finishing foam.

GT23408 - 8 oz. • GT23432 - 32 oz. • GT23401 - 1 gal.

Item	Description	Case Pack	Case Weight
